1.	In a proxying server coupled to a client, a method of providing a document to the
client,	the method comprising the steps of:
providi	ng the document to the proxying server, the document including image data and
non-image da	ata for causing the client to generate a display;
partitio	ning the document into a plurality of partitions;
downlo	ading data of a first partition to the client: and

repeating a step of downloading data of a next partition to the client, the step of downloading data of the next partition to the client being performed after a step of downloading data of a previous partition to the client, the repeating step repeated until each one of the plurality of partitions has been downloaded to the client.
